[Managing Your Share House Responsibilities](#)

The article discusses the challenges of managing responsibilities in a shared house, including shared vs. individual expenses, managing expenses, groceries, and chores. The problems users face are related to tracking and splitting bills, managing groceries, and coordinating chores in a shared living environment. The solutions provided include establishing clear agreements about shared and individual expenses, using online bill payment systems like BPAY for tracking and settling expenses, creating a budget for better financial management, and utilizing apps like Our Groceries and Our Home to coordinate grocery shopping and chores efficiently. The article emphasizes the importance of communication and collaboration among housemates to ensure a smoothly running household.

[WG Apps: Die besten 5 in der Übersicht](#)

This article explores a selection of apps designed to ease the challenges of shared living arrangements, such as managing expenses, chores, groceries, and more. It provides insights into five popular apps, highlighting their features and benefits. Whether you're a student sharing a flat or part of a multi-person household, these apps aim to streamline your daily life and financial coordination.

To not have too many collisions with the review of my group mates, I here focus only on the apps that weren't covered beforehand:

Tabbt: German Efficiency for Expense Sharing

Tabbt, a German app, aims to simplify cost-sharing for shared living, vacations, or relationships. What sets it apart is the array of login

methods, from email to Google and Facebook. Tabbt integrates with bank accounts, enabling direct payments from the app. It offers a practical and visually appealing solution, and it's entirely free and ad-free, making it suitable for various cost-sharing scenarios. Tabbt is accessible on iOS and Android.

Clean My House: A Cleaning Schedule Manager

Clean My House focuses on creating cleaning schedules for shared living spaces, allowing users to list tasks with specified intervals. While it's user-friendly and helpful for organizing cleaning responsibilities, it currently lacks the ability to share task lists across roommates' devices. Clean My House is currently available for Android and provides a straightforward approach to keeping shared spaces clean. However, it may benefit from enhanced collaboration features among roommates.
